To all PMMA colours not listed in the table below and available in relevant delivery schemes only the Country group I applies with the maximum guarantee period of ten years. No special guarantee is granted for all other country groups.

An additional guarantee is valid until the end of year ten after the guarantee has been initiated and the abovementioned guarantee periods have expired. It applies to all colours listed in Country groups IV and V with guarantee periods. The following conditions apply:

- Colour deviations greater than 2 according to ISO 105-A02 grey scale are considered a defect.
- The defects were caused by natural weather conditions.

For such a defect, the current component value (excluding window panes and fittings) shall be returned; the components can also be replaced with a technically equivalent or better profile generation, at GEALAN's discretion.

The current value is the original price of a new woodwork item (excluding window panes and fittings), reduced by a 10% discount per year, beginning from the additional guarantee starting date.

Guarantee conditions for acrylcolor surfaces on PVC profiles

Window profiles with GEALAN-acrylcolor surfaces are manufactured through co-extrusion, during which a white PVC substrate and tinted acrylic glass (PMMA) (in accordance with Appendix 1) are fused using state-of-the-art technologies and production processes. GEALAN window profiles are environmentally friendly and fully recyclable. The recycled material is used to manufacture new profiles.

An integrated quality and environment management system compliant with DIN EN ISO 9001, 14001, and EMAS III, and their observance and monitoring based on DIN EN 12608-1:2016 for relevant registered profiles ensures high-quality and environmentally friendly production. GEALAN offers an environmental contract to its clients. Moreover, GEALAN is a member of the Rewindo and VinylPlus® window-recycling initiatives, following circular-economy principles in material management.

Properties of acrylcolor surfaces on profiles:

Acrylcolor surface on profiles meets the requirements of RAL-GZ 716 (PVC window profile systems, quality assurance, and RAL-GZ 716), the 2018 version (hereinafter called "RAL-GZ") according to the supplier's specifications. The RAL-GZ requirements are considered to be reconciled for the quality characteristics of acrylcolor surfaces.

Subject of the guarantee:

GEALAN grants a guarantee for the natural ageing (weather resistance) of acrylcolor surfaces, provided that the conditions specified herein are met and the material is processed and used per its intended use.

The weather resistance guarantee specified herein shall apply, in accordance with the relevant colour variants of the acrylcolor surfaces, from the moment of risk transfer until the end of the guarantee period as per the Terms and Conditions stipulated in Appendix 1 hereto. Appendix 1 shall be deemed to form an integral part of the Terms and Conditions.

The weather resistance guarantee shall cover acceptable surface changes as specified in RAL-GZ, resulting from natural weather conditions and solar radiation during the guarantee period.

The guarantee shall exclude damage to the acrylcolor surfaces that is not caused solely by natural weather conditions, including but not limited to damage resulting from exposure to chemical and mechanical factors.

The assessment of colour change due to weathering is based on ISO 105-A02 (grey scale), 4th edition, of 1 September 1993.

Accordingly, weather resistance in terms of colour change occurs when the grey level under test conditions is not lower than 3. Due to the diverse climatic and environmental influences in natural weather conditions and in order to ensure good repeatability, the manufacturer shall verify weather resistance in accordance with EN 513 in a xenon test as per ISO 4892-2.

A defect occurs when colour changes exceeding level 3 on the grey scale in accordance with ISO 105-A02 occur as a result of natural atmospheric conditions within a specified guarantee period.

Weather resistance is specified in relation to other (non-colour-related) significant appearance defects if no delamination, stains, blisters, streaks, cracks or other defects are visible to the human eye in a microscopic visual inspection (20x magnification).

Guarantee conditions:

GEALAN offers the guarantee only if all the following conditions are met:

- a. Occurrence of a significant defect in the acrylcolor surface in accordance with this Agreement at the time of risk transfer.
- b. Profiles with acrylcolor surfaces supplied ex works by GEALAN are processed in accordance with recognised technical standards and in compliance with the relevant GEALAN production instructions.
- c. Defects of any kind are not caused by improper handling by the customer; this includes defects resulting from manufacturing processes, transport, assembly, cleaning, shocks, abrasion, mechanical damage, negligence,

deliberate damage, soiling, or other effects, unless the defects are caused solely by natural weather conditions.

d. The following technical conditions and specifications shall be fulfilled:

Chemical resistance: Product not sensitive to common household agents such as ammonia water, weak aqueous surfactant solutions, GEALAN cleaning agents, and water and construction materials, e.g. cement and gypsum.

Non-resistant to all other organic solvents, organic solvent mixtures, and solvent-containing preparations (e.g., paint thinners, paint removers, polishing pastes, adhesives, etc.).

Care instructions: Clean with a damp soft cloth using a GEALAN cleaning agent. Do not use abrasive cleaning agents. Follow GEALAN cleaning and care instructions.

Guarantee scope:

During the guarantee period, GEALAN shall provide a guarantee for the acrylcolor surface on profiles in accordance with the Terms and Conditions under the applicable cooperation agreement. This may include a repair or subsequent delivery of profiles or technically equivalent or improved profile generations. Compensation for consequential damage is excluded.

The right to compensation under contractual or non-contractual liability, including claims for compensation for futile expenses or lost profits, as well as liability for damage caused by the product to the legal property of the customer or third parties, e.g. damage to other property, is excluded.

This shall not apply to liability for damage resulting from wilful or gross negligence on the part of GEALAN or wilful or gross negligence on the part of a legal representative or agent operating on behalf of GEALAN, nor to liability for culpable life, health or bodily injury. Mandatory liability under the Product Liability Act or equivalent mandatory provisions of a foreign legal system shall remain unaffected.

If GEALAN is not charged with an intentional breach of contract or with culpable exposure to loss of life, bodily injury, or damage to health, liability for damage shall be limited to foreseeable, typical damage.

Supplementary final provisions:

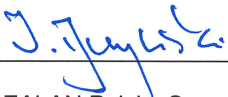

The Terms and Conditions above shall apply from signing the Agreement and shall exclusively relate to the supply of acrylcolor profiles in accordance with Appendix 1. They shall remain valid until revoked.

This guarantee shall replace all previous guarantees issued for GEALAN-acrylcolor® surfaces.

The guarantee shall be governed by Polish law.

The Parties agree that the Court in Łódź shall be the place of proper jurisdiction for any disputes arising from the guarantee.
